

No. of Functional Features Included in the Solution

Date	28 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Functional Features Overview:

This document presents the functional features implemented in the Comprehensive Measure of Well-Being project. The system uses Machine Learning to predict the Human Development Index (HDI) based on key development indicators and classifies the result into Low, Medium, High, or Very High HDI categories through a Flask web application.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Home Page	Displays project introduction and navigation	home.html	Done	High
2	HDI Prediction Form	Accepts user inputs for prediction	indexnew.html	Done	High
3	Machine Learning Prediction	Predicts HDI score using trained model	app.py + HDI.pkl	Done	High
4	HDI Classification	Categorizes result as Low, Medium, High or Very High	app.py	Done	Medium
5	Result Display	Shows predicted HDI and category	resultnew.html	Done	Medium
6	Flask Routing	Connects all webpages using Flask routes	app.py	Done	Medium
7	User Input Validation	Required fields prevent empty submissions	HTML Forms	Done	Medium
8	Deployment	Application deployed on Render	Render Cloud	Done	High

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	5
Additional / Nice-to-Have Features	3
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Home Page, Prediction Form, Result Page
2	Backend / Logic	3	Flask Routing, ML Prediction, HDI Classification
3	Database / Storage	1	HDI.pkl Model File
4	API / Integration	1	Flask Request Handling
5	Security / Authentication	1	Form Input Validation
