Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Project Executable Files

This document provides the executable files, deployment details, project structure, and instructions required to run and evaluate the Comprehensive Measure of Well-Being application.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes/No/NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

ML- Human Development Index/

```

|— Dataset/
|   └─ HDI.csv
|
|— Flask/
|   └─ templates/
|       └─ home.html
|       └─ indexnew.html
|       └─ resultnew.html
|
|   └─ app.py
|   └─ HDI.pkl
|   └─ Procfile
|   └─ requirements.txt
|   └─ runtime.txt
|
|— Training/
|
|— HumDevIndex.ipynb
|— .gitignore
|— README.md
└─ render.yaml
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://human-development-index-prediction.onrender.com
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Render
Repository Link	https://github.com/bhavanaaki/Human-Development-Index-Prediction
Demo Video Link	https://drive.google.com/file/d/1D2ObPckxFQh-MclNpqjGoqR3_sVH0tGh/view?usp=sharing

Step 4: Run Instructions

Pre-requisites:

- Python 3.11+
- Flask
- scikit-learn

Steps:

Step 1: Clone the repository from GitHub.

Step 2: Install the required packages.

pip install -r requirements.txt

Step 3: Ensure the **HDI.pkl** model file is present in the project folder.

Step 4: Run the Flask application.

python app.py

Step 5: Open your browser and visit: <http://127.0.0.1:5000/>

Step 6: Enter the required values and click **Predict HDI** to view the prediction.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Only selected countries are available in the dropdown.	Can be expanded by updating the dataset and UI.
2	Prediction depends on the trained model accuracy.	Can be improved with more training data.
3	Application requires internet access for deployment.	Runs locally using Flask without deployment.
