

## Project Demo Planning

|                      |                                       |
|----------------------|---------------------------------------|
| <b>Date</b>          | 30 June 2026                          |
| <b>Team ID</b>       |                                       |
| <b>Project Name</b>  | A Comprehensive Measure of Well-Being |
| <b>Maximum Marks</b> | 1 Mark                                |

### Project Demo Planning:

| S.No | Demo Section       | Description                                                                     | Duration (mins) | Responsible Member |
|------|--------------------|---------------------------------------------------------------------------------|-----------------|--------------------|
| 1    | Introduction       | Introduce the project title and objective.                                      | 0.5             | Swaran Karubothu   |
| 2    | Problem Statement  | Explain why HDI prediction is important and its applications.                   | 0.5             | Swaran Karubothu   |
| 3    | Project Overview   | Explain dataset, ML model, technologies, and workflow.                          | 1.0             | Bhavana Aki        |
| 4    | Code Explanation   | Explain preprocessing, model training, Flask integration, and prediction logic. | 1.5             | Bhavana Aki        |
| 5    | Live Demonstration | Show website, enter sample inputs, predict HDI, and display result.             | 1.0             | Bhavana Aki        |
| 6    | Conclusion         | Summarize the project, benefits, and future enhancements.                       | 0.5             | Manohar Katlagunta |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                                |
|------|----------------------------------|--------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Introduce the project and explain the need for HDI prediction.                       |
| 2    | Solution Overview                | Explain dataset, Linear Regression model, Flask application, and workflow.           |
| 3    | Live Feature Demonstration       | Run the web application, provide sample inputs, predict HDI, and explain the output. |
| 4    | Q&A Session                      | Answer basic questions about the model, technologies, and future improvements.       |
